DETAILED ACTION

Allowable Subject Matter

1. Claims 1-55 are allowed.
2. The following is an examiner's statement of reasons for allowance: Claims 1-55 are patentable for the subject matter of a method of setting a state for morphing.

The admitted prior art by applicant describes a virsyn cube synthesizer, which has been set for four fixed points each associated with the group of one or more parameters. U.S. Pat No. 5,933,150 to Ngo et al. teaches setting the state value by combining with a respective weighting factor (see col 12 lines 8-34 Ngo et al.). None of the cited prior art teaches or suggest using at least more than five fixed points and determining the respective weighting factor depends on the position of the unfixed point relative to that fixed point recited in the claim 1. Claims 26, 48-51, 53, and 55 disclosed the similar subject matter as claim 1. Thus, Claims 1-55 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, see page 15, filed 09/28/2005, with respect to Claims 50-55 have been fully considered and are persuasive. The rejections of claims 50-55 have been withdrawn.
